Click the name of each sensor for mapping it to a desired body part

Make sure that all lights on the sensors have turned green before moving to the next step

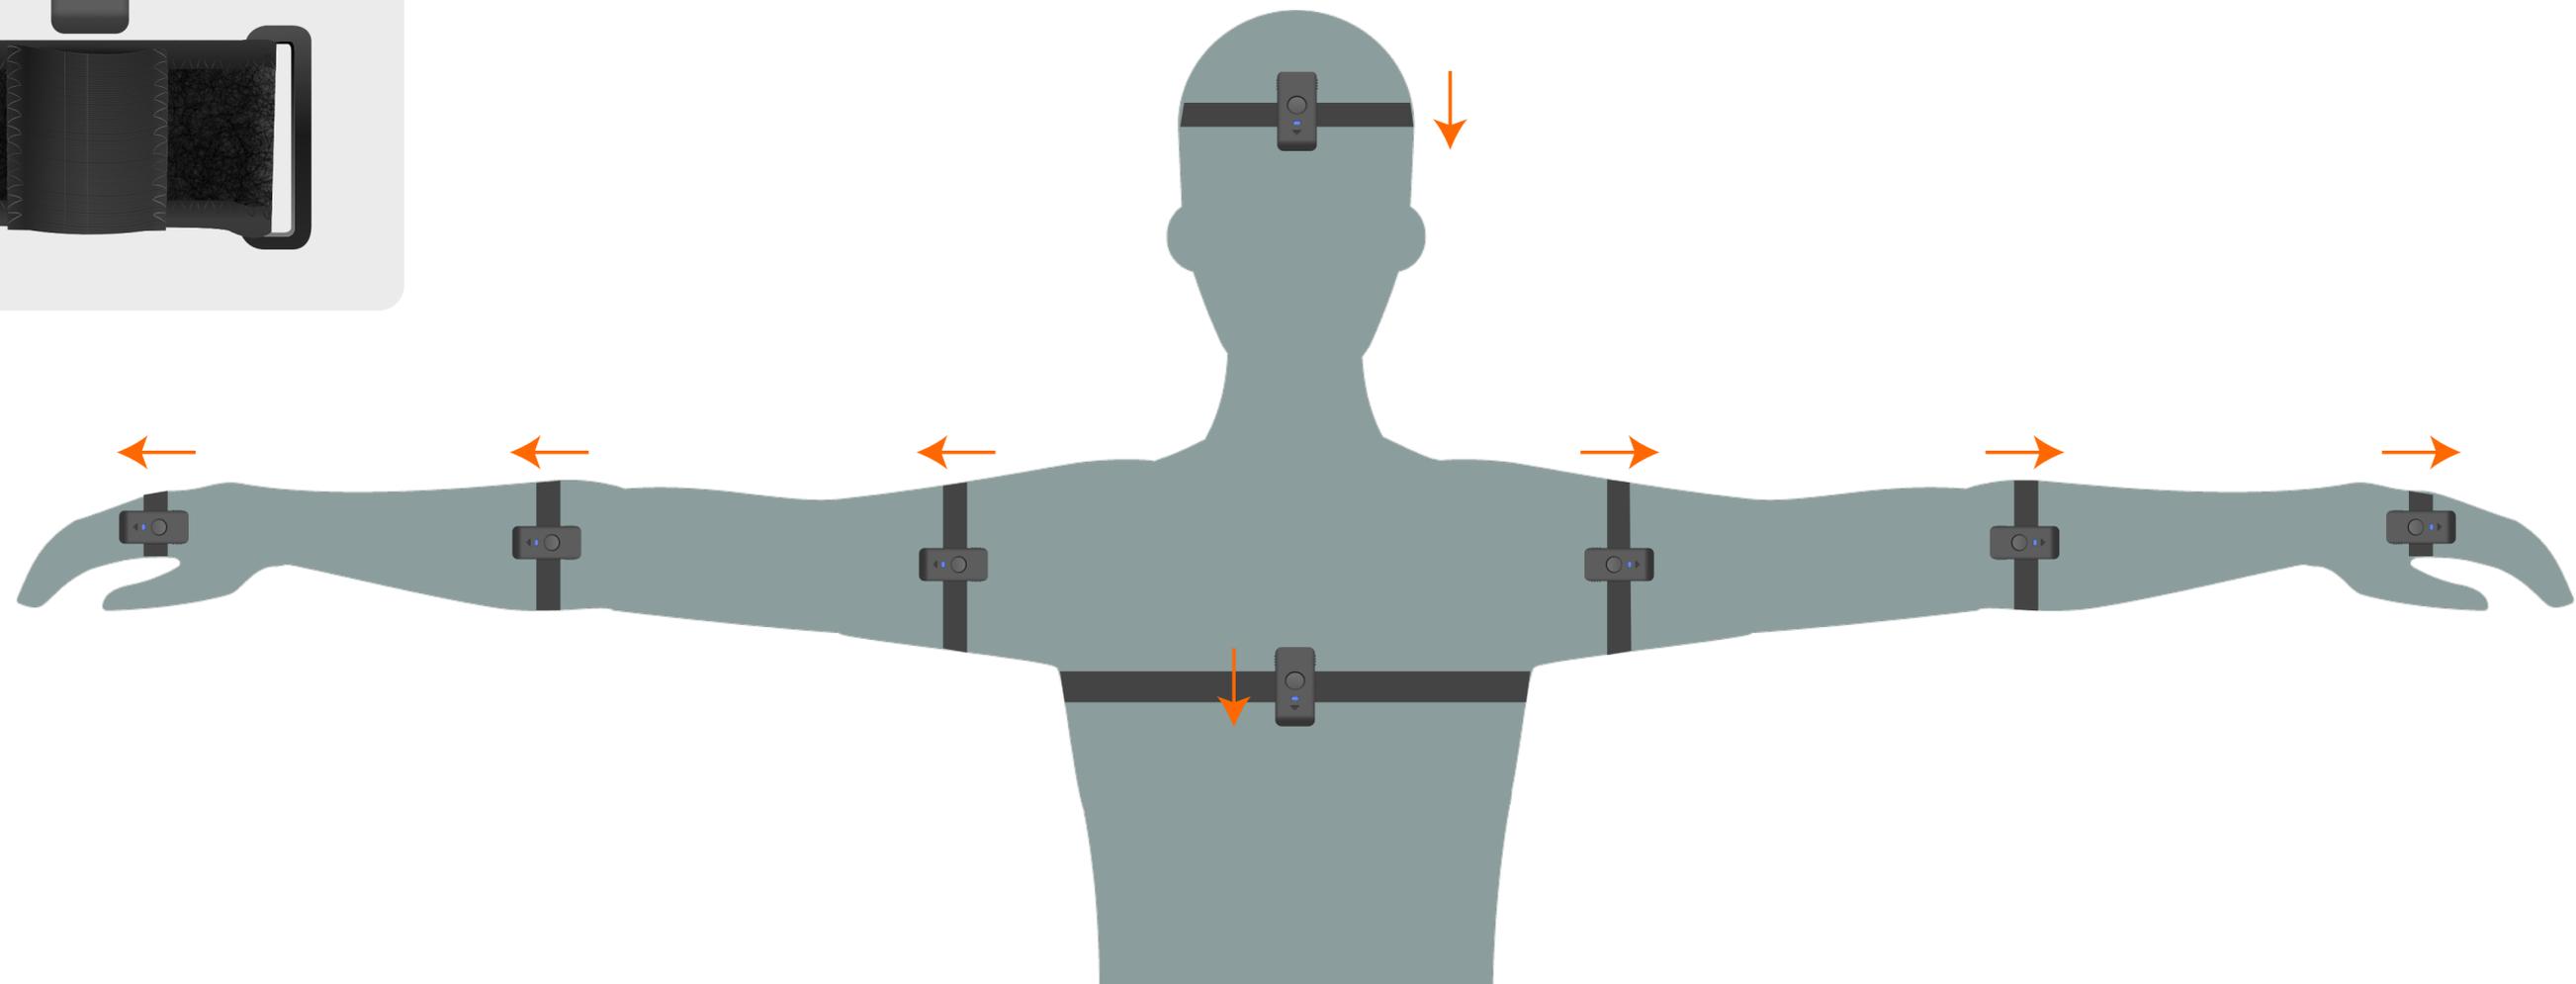

## Wearing

Fit the straps and sensors to the specified positions

⚠ Please make sure all the arrows on the sensors are pointing down when you are in a natural standing pose

## Body Manager

The screenshot displays the Body Manager interface. On the left, there is a 'Scan' button and a list of sensors: AC-587, BD-643, AG-592, CE-128, AC-498, AE-332, BQ-257, and TK-245. The central part of the interface shows a human silhouette with various body parts labeled and connected to sensors. The labels and sensor IDs are: Head (AC-587, 15.43 cm), Neck (7.71 cm), Chest (AC-498, 50.39 cm), Shoulder (29.00 cm), Upper Arm (BD-643, 19.50 cm), Upper Arm (AE-332, 19.50 cm), Forearm (AG-592, 21.00 cm), Forearm (BQ-257, 21.00 cm), Hand (CE-128, 33.46 cm), and Hand (TK-245, 33.46 cm). Each sensor ID is accompanied by a battery level indicator. On the right, there is a 'Body Manager' dropdown menu with a list of profiles: Female 155, Female 160 (highlighted), Female 165, Male 170, Male 175, Male 180, Male 185, and Male 185. Below the list is a 'Save' button. At the bottom of the interface, there are 'L' and 'R' labels, a 'Done' button, and a legend for connection status: Connected (green dot), Connecting (yellow dot), Disconnect (grey dot), and Low Battery (red dot). There is also a 'Tips' icon.

You can pick a proper body profile from the Body Manager on the upper right corner

You can also key in the value and save it as a custom profile

## Calibration

Click on Calibration button and go on with the on-screen instruction that will guide you through the process.

► Calibration can be done while standing or sitting.

The screenshot displays the calibration interface. On the left, a 3D mannequin is shown in an 'L Pose' with its arms extended forward. A progress bar below the mannequin is partially filled with a teal color, indicating 20% completion. The text 'Please raise your hands forward, palms parallel to the ground, and maintain this position until the progress is completed.' is displayed above the mannequin. The control panel on the right includes a 'Go back to setting' button, a 'Device connection status' indicator, a 'Body Details' section with a table of measurements, and buttons for 'Tips', 'Calibration', and 'Power off'. A 'Deploy' toggle switch and a 'Port' input field are also visible.

Body Details	
Female 150	
Head	15.43
Neck	7.71
Body	50.39
Shoulder Width	29.00
Upper Arm	19.50
Forearm	21.00
Palm	15.50

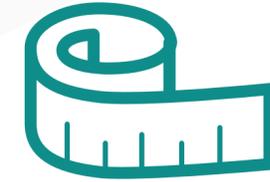

Legend:

- Connected
- Connecting
- Disconnect
- Low Battery

Annotations:

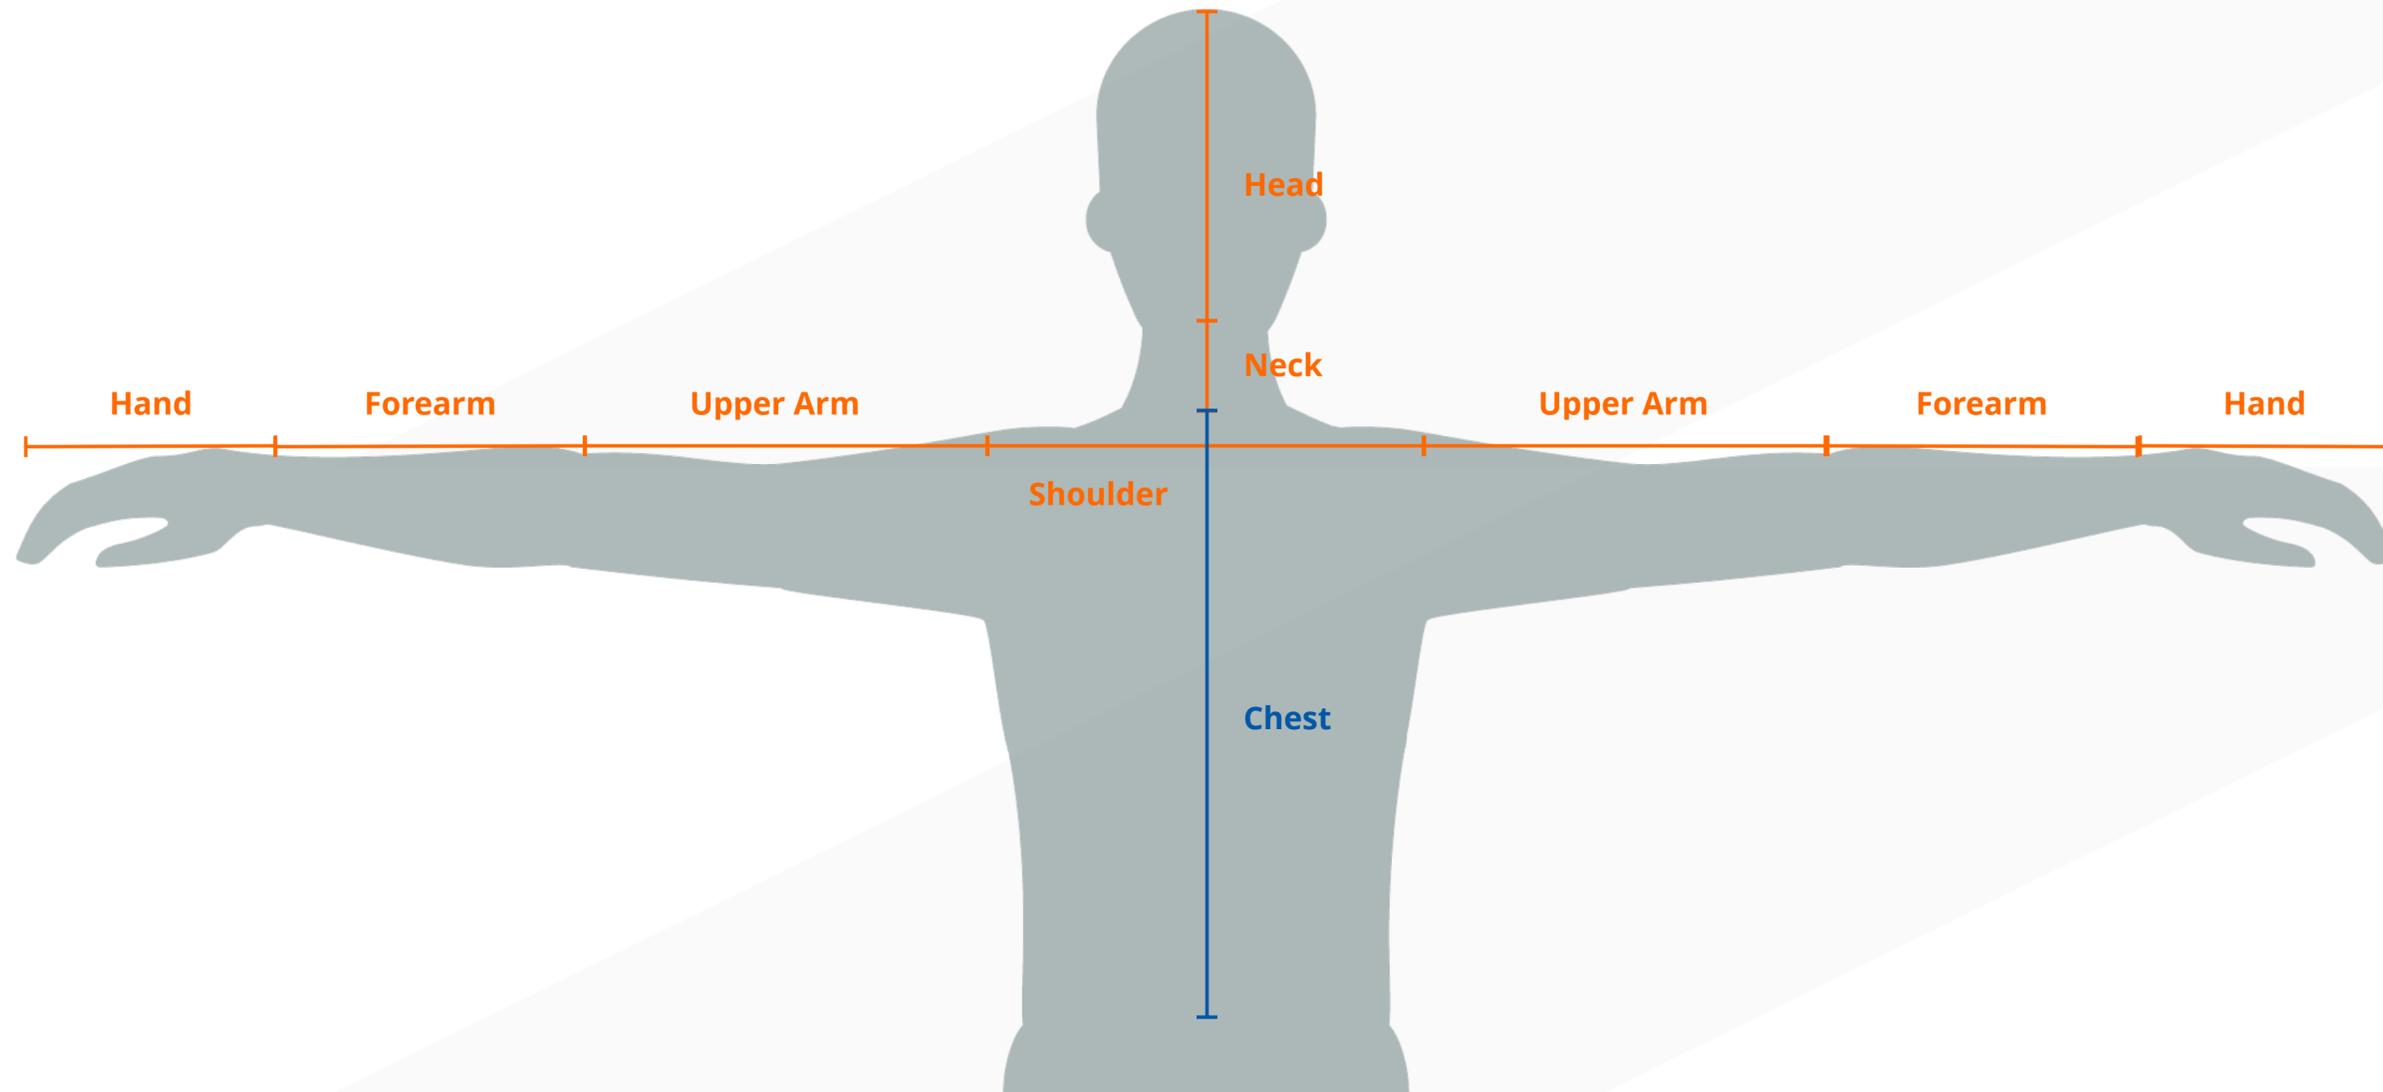

- Go back to setting
- Device connection status
- Body details in use
- Once the "Calibration" button is clicked, it will start the process
- Click the close button to turn off all devices at once
- Enter the value here to open the port

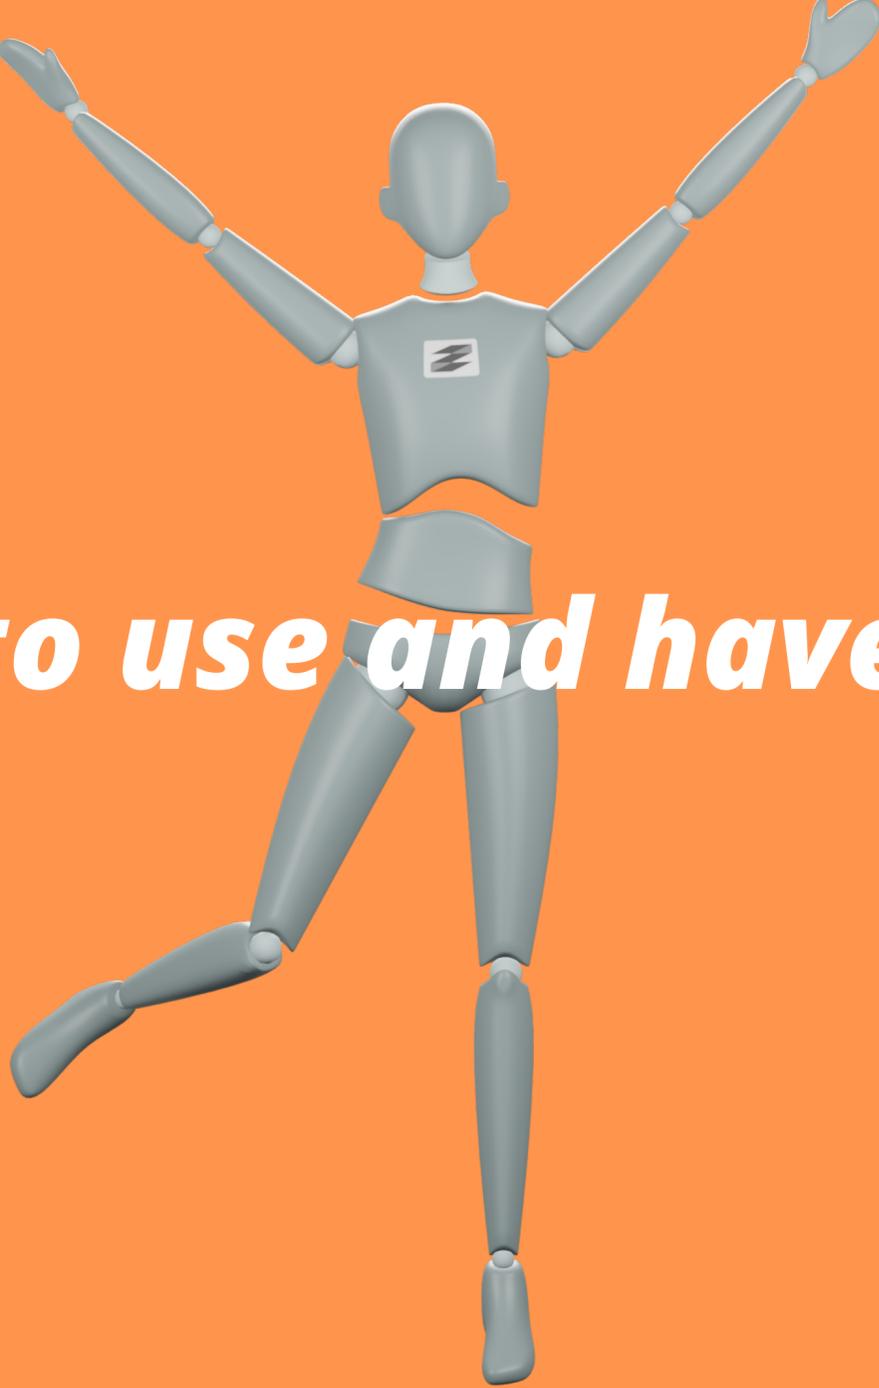

# Body Measurement

## How to take accurate body measurements

Use a soft measuring tape or piece of string that can later be measured

***Start to use and have fun !***
